

**Result Group is a leading
international consulting firm for
global risk and crisis management.**

Our experts advise multinational corporations,
public institutions and exposed private clients
in managing security risks – 24 hours a day, worldwide.

Our Security Solutions

Find out more about our comprehensive range of security solutions.

01

Risk Management

Recognize, correctly assess and respond appropriately to security risks for your company or exposed individuals.

Our services range from the creation of a 360° risk analysis to developing a comprehensive security concept.

02

Crisis Management

Management of a crisis is the most demanding discipline of risk management.

Our experienced experts will support you in responding to every imaginable crisis situation.

03

Travel Risk Management

Travel risk management involves preventing risks for employees on business trips abroad.

As a business enabler, we support security planning and implementation of projects abroad.

04

Personal Protection | Executive Protection

Your integrity and the highest level of discreet security are our focus.

We support corporate executives, exposed private individuals and their families as well as private asset management institutions (family offices) and foundations.

05

Corporate Intelligence

Our analysts identify potential business risks.

This includes checking applicants, business partners, people and companies through pre-employment screenings, OSINT research and international executive and business partner screenings and investigations.

06

Academy

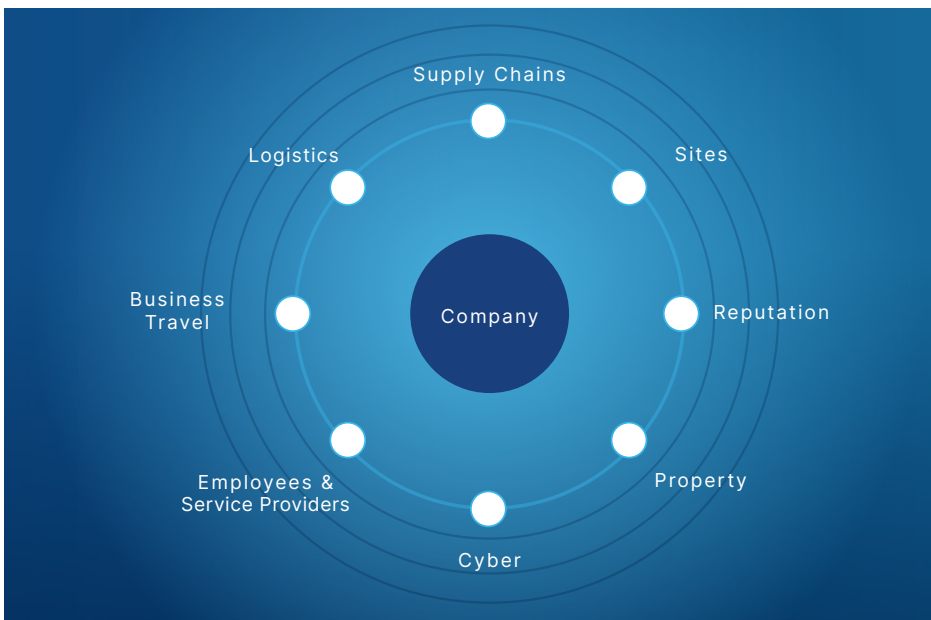

We prepare your employees, business travelers, journalists and expatriates for country-specific security risks.

We carry out crisis team exercises for companies and security trainings for private individuals and their families.

01

Risk Management

To protect against criminal threats such as corruption, burglary, theft, assault, espionage, reputational damage and other events, it is important that companies implement risk and security management. This ensures the stability of business processes.

Crisis management teams

Preparation for crisis situations and emergencies to strengthen business resilience.

Crisis team advice

In crisis situations, we offer comprehensive advice, including tactical measures in the event of ransomware or cyber attacks, to protect your company's trust and reputation.

Recognising and correctly assessing security risks in companies

Our offer ranges from the creation of a 360° risk analysis to the specific assessment of identified threats. We analyze the possible dangers and evaluate the probability of occurrence.

Security audits

We use site surveys and audits to investigate threats and identify ways to minimise risks.

- Auditing of locations
- Auditing of real estate
- Auditing of employees and service providers

Physical and technical Security

Security concepts for company sites. Structural, technical and organisational security is developed in such a way that the protection goals are achieved in a resource-saving manner.

Business Continuity Management

Ensure business process stability and create corporate resilience

- Tailored training and exercises

02

Crisis Management

As a result of our many years of expertise in dealing with crisis situations, we as a German company are a proven cooperation partner for globally operating corporations, family offices and private individuals.

Rapid support in emergencies and crises

With our experienced team of experts, we offer active support in cyberspace and in global crisis situations. Our cross-industry expertise makes the difference.

Cyber crises & ransomware attacks

With our 24/7 availability, we can respond quickly and provide immediate assistance to our clients.

We communicate with the perpetrators and coordinate with the responsible law enforcement authorities.

- Avoid cyber crises through preparation
- Negotiation & crisis management advice

Active crisis team consulting – immediate measures in crisis situations

Competent consultants with experience in crisis management can begin work immediately after our customers alert us - because successfully managing a crisis requires quick and decisive action.

Evacuations

Threats

Kidnapping for ransom support

Blackmailing and product extortion

03

Travel Risk Management

We support the security of projects, locations and business processes abroad and protect employees worldwide on business trips.

Travel Risk Management: Advice on setup and implementation

Ensuring the security of your business travelers, foreign employees, project teams and local employees in their global activities represents a conceptual and organizational challenge.

Security Assistance

We support your employees in security matters and in the event of security incidents.

- 24/7 emergency hotline
- Country and city information
- Smartphone-App: always informed about incidents
- Traveller Monitoring
- Secure transportation
- Security training in preparation for assignments abroad

Security concepts and risk analyses

Before the project begins and employees are deployed, we carry out comprehensive risk assessments and create security concepts to protect your employees.

We support you in implementing your duty of care by identifying current threats to your business travelers and deployed employees.

- Risk analysis for projects abroad
- Auditing the security measures at your locations or on projects in countries with increased security risks
- Examination the security and safety conditions of accommodation, offices, buildings and routes.
- Recommendation and organization of safe means of transport, such as driving services.
- Evaluation the existing travel management processes
- Development of contingency plans for various scenarios such as evacuation.
- Detailed written report with identified risks and recommendations.

External security management

For projects in high-risk regions, we are happy to coordinate security measures so that you can fully concentrate on your business activities.

04

Personal Protection | Executive Protection

Tailored to the individual threat level, our solutions ensure the highest level of security without compromising one`s privacy.

Individual security concept

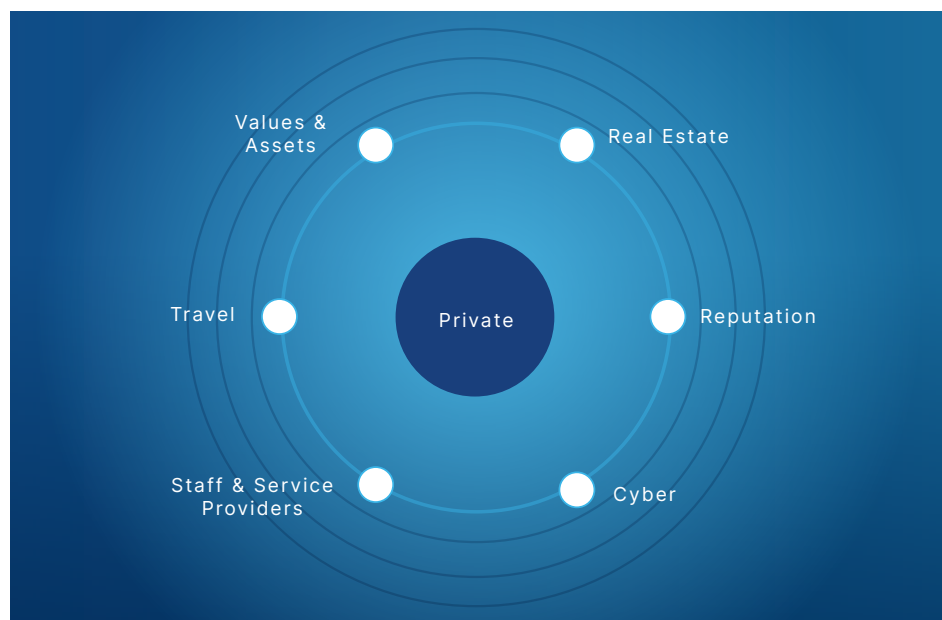

Our holistic approach aims at disrupting your privacy as little as possible.

The concept is based on a thorough analysis of risks and threats. Our experienced consultants work closely with you.
